Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as anticipated by LAFLEUR (WO 99/31006) or, in the alternative, under 35 U.S.C. 103(a) as obvious over LAFLEUR.

The LAFLEUR reference discloses a method for filling synthetic resin containers (i.e. PET containers) comprising providing sterilized containers (see line 5 of Abstract), preliminarily sterilizing a content (see line 3 of Abstract), cooling the contents to normal (i.e. this would be returning the filled container to room temperature after the filling process), and filling the content under a temperature within a range of 50-60 degrees C (i.e. abstract on lines 3-5 state that the beverage is cooled to a temperature lower than that in which the PET container would deform which is Applicant's claimed temperature range, see also claim 13 in the reference in which temperature ranges of 50-70 degrees and 55-65 degrees as claimed). However, if Applicant takes issue over the precise temperature range not being that of 50-60 degrees C, it would have been obvious to one of ordinary skill in the art at the time the invention was made to fill beverage at temperatures falling between 50 to 60 degrees C (if not already), since it has been well settled and held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. See *In re Aller*, 105USPQ 233.
